

HEALTH SPACE

CSE: HS

Healthspace Overview

HealthSpace (CSE: HS) is the leading provider of environmental health software solutions in North America. We serve over 300+ government agencies and are bridging the gap between government and commercial enterprise.

Our Product: HSCloud Suite Pro

A platform that combines inspections, reporting, management and data through our three products.

HSTouch

A native iOS, Android and Windows app for field inspections

HSCloud

Cloud based portal for managing apps, licensing, permits and other data

HSData

Environmental health reporting and analytics tool

Use Case: Chipotle Outbreak

National and Local health departments did investigations and were able to pinpoint the chains with the issue, the food being served, where it came from and ultimately the illness.

A class action lawsuit was brought against Chipotle resulting in a sales drop of 30%, which lost the company USD\$6 billion in market capitalization

Who Benefits From Our Product

Agriculture

Health Care

Food & Beverage

Retail

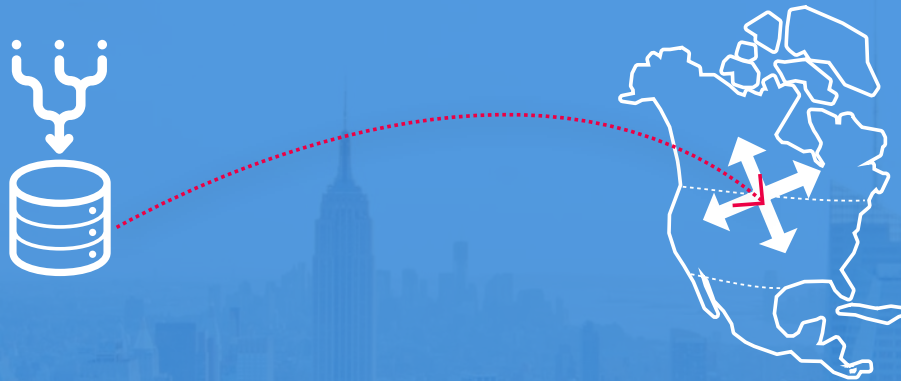

Hospitality

Cannabis

What's Next: HSDData

HealthSpace will complete the aggregation of US and Canada's publicly available environmental health data to develop a composite health data-set to sell into the North American market
