

## **NEWS RELEASE**

### **HealthSpace Announces 1<sup>st</sup> Commercial Food & Beverage SaaS Customer**

**VANCOUVER, BC – July 19, 2017** – HealthSpace Data Systems Ltd. (“HealthSpace”) is pleased to announce that it has signed its first commercial food & beverage SaaS contract with LB Steak (<http://www.lbsteak.com/>) group in 5 locations. This contract will run for an initial 12-month term.

This is the first delivery of the HealthSpace Cloud Suite Pro technology platform to a commercial enterprise vertical. LB Steak evaluated HealthSpace’s technology and its prospective impact on their business group’s ability to gain predictability and visibility into their overall performance. HS CS Pro allows for LB Steak to quickly and easily perform their regular quality checks on different facets of the business, via the HSTouch app. This includes the ability to perform the same public health inspection that the regulating jurisdiction performs. This allows for the LB Steak to easily identify any areas in environmental health or ambience that require attention and ensure the continued quality of their brand. LB Steak is currently utilizing the HSTouch product to perform their regular inspections and audits on their group of restaurants.

HealthSpace CEO, Peter Smyrniotis stated “HealthSpace is thrilled to be working with the LB Group. Their restaurants, primarily situated in the heart of Silicon Valley, embrace complete transparency in how they source their steaks, chops, poultry and seafood. They serve locally raised natural poultry and lamb as well as sustainably sourced seafood in the most modern of locales. The LB Group are hallmark customers and their decision to partner with us is a significant milestone for HealthSpace. In addition, we are pleased with the reception we have had from several other potential commercial partners in the food & beverage space, and anticipate significant growth in this vertical in the coming year. I am very proud of the HealthSpace Technology team on the work they have done in designing, developing, and delivering our products to market.”

#### **About HealthSpace Data Systems Ltd.**

HealthSpace is an industry leading technology company currently providing inspection, information, communication and data management systems for federal, state, county and municipal governments. Over the last decade, HealthSpace has successfully developed both enterprise and mobile internet-based applications currently serving over 300 state and local government organizations across North America. HealthSpace currently offers the only integrated inspection, administration and analytics product suite across all platforms in North America. Further, HealthSpace now delivers its government grade technologies to private businesses enabling them to gain visibility and predictability into their own organizations and move from a reactive to a proactive operational status. HealthSpace continues to deliver focused service and innovative solutions to government organizations, while expanding into commercial enterprise verticals to enable new customers with proactive environmental health best practices and policies.

#### **Forward-Looking Statements**

This release may contain forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although HealthSpace believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward looking statements. HealthSpace expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.
