News Release

HealthSpace Provides Statewide Public Access to Health Inspections for Oregon Residents

Vancouver, BC – February 28, 2018 - HealthSpace Data Systems Ltd. (the "Company" or "HealthSpace") (CSE:HS) (Frankfurt:38H) (OTC:HDSLF) is pleased to announce that the Company has launched a new web portal on behalf of the Oregon Health Authority ("OHA") that will allow the public to easily find inspection reports for facilities such as restaurants, swimming pools and hotels.

The portal is part of an updated statewide licensing and inspection system hosted by HealthSpace. This updated system will also collect inspection data in a way that will help OHA and county health departments better identify violation trends.

"For the first time people can get inspection results for every licensed facility in the state," said David Martin, Foodborne Illness Prevention Program coordinator at the OHA Public Health Division. "It will also give us improved data that we will use to address risk factors that can lead to illness or injury."

"The rollout exceeded expectations," Martin said. "HealthSpace was released on time and for less than was budgeted. It will be a great tool for our industry and regulatory partners to improve compliance and better protect the public from food, pool and lodging-related illness and injury."

HealthSpace hosts over 40 public facing web sites across North America giving the public access to inspection results. HealthSpace President, Joe Willmott stated "Our public disclosure sites have been featured on numerous news casts including NBC's Dateline." Willmott added "In addition to the OHA testimonial, the non-profit Dining Safety Alliance has endorsed the HealthSpace disclosure sites as being unsurpassed."

"With our advanced verification, inspection and auditing tools we can enhance the public/private engagement to reduce risk and improve safety," Willmott said.

Oregon has about 25,000 licensed food, pool and lodging facilities. They include restaurants, mobile units, commissaries, warehouses, vending operations, swimming pools, spas, travelers' accommodations, recreational parks and organizational camps. All facilities are licensed and inspected locally by county health departments.

Inspections are unannounced and focus on items most likely to cause illness or injury to patrons, but also include items such as general cleanliness and maintenance. In a food service facility, the focus is on approved food sources, cooking temperatures, holding temperatures of food, personal hygiene of food handlers and contaminated or dirty equipment. For a public pool or spa, the emphasis is on proper disinfection, clarity, entrapment concerns, proper filtration and the pool enclosure. Tourist facilities are evaluated for safety and general sanitation concerns.

OHA's online inspection portal can be accessed at:

https://healthspace.com/Clients/Oregon/State/StateWebPortal.nsf/home.xsp.

HealthSpace replaces a system known as Phoenix that had been in use by 34 Oregon counties since 1994.

This will be the first time that this information is available to the public for 34 of Oregon's 36 counties. Two other counties, Washington and Multnomah, use their own licensing and inspection reporting sites, although Multnomah County will be using HealthSpace starting in March 2018.

About HealthSpace

HealthSpace is an industry leading technology company currently providing inspection, information, communication and data management systems for federal, state, county and municipal governments. Over the last decade, HealthSpace has successfully developed both enterprise and mobile internet-based applications currently serving over 300 state and local government organizations across North America. HealthSpace currently offers the only integrated inspection, administration and analytics product suite across all platforms in North America. Further, HealthSpace now delivers inspection and auditing systems to private businesses enabling them to gain visibility and predictability into their operations to improve performance and safety. As HealthSpace continues to deliver focused service and innovative solutions to government and business organizations, it is developing advanced blockchain technology to revolutionize service delivery to its core market while expanding into other commercial enterprise verticals.

Forward-Looking Statements

This release may contain forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although HealthSpace believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward looking statements. HealthSpace expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.
