

**FORM 7**  
**MONTHLY PROGRESS REPORT**  
**For the Month of March, 2018**

Name of CSE Issuer: **Healthspace Data Systems Ltd. (the “*Issuer*”).**

Trading Symbol: **HS**

Number of Outstanding Listed Securities: **136,497,988 common shares**

Date of filing: **April 3, 2018**

**Report on Business**

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

**HealthSpace is now delivering its new Software-as-a-Service (SaaS) flagship technology platform HS Cloud Suite Pro, which incorporates a cloud-enabled administration dashboard; with a multi-endpoint mobile auditing and reporting system that offers native apps on all major platforms; and a rich reporting and analytics toolset to maximize business intelligence activities. Feedback on this new platform from existing customers and new prospective clients in both government and commercial enterprise engagements has been very positive.**

**HealthSpace’s ongoing engagement with government customers in both the US and Canada continues to drive growth and viable learning opportunities to continue to innovate our technology offerings. In 2018, we are now actively introducing our platform and services into commercial enterprise clients in food & beverage, hospitality, assisted living, and child-care. Ongoing discovery work based on HealthSpace’s agricultural capabilities is now being integrated into cannabis production and distribution processes through work with both US and Canadian partners.**

- **On March 5, 2018 the Company announced the launch of an innovative quality control and customer experience application for restaurants that will help improve the overall health, safety and standards for food establishments across North America.**

**HealthSpace has teamed up with Keboola Data Services Inc., a data analytics solutions provider, and Xotec Solutions Corp., a technology company that provides customer engagement software. This collaboration will enhance HealthSpace’s current self-inspection solution, HealthSpace CS Pro, by integrating customer retention applications and health department inspection results. The application will enable restaurant**

operators to seamlessly compare and track their internal health and safety practices with data analytics from government regulators as well as the general public through customer feedback.

This new application takes advantage of an increasing trend with public sector regulators to be more proactive in assisting the private establishments they monitor and license. The goal is for the establishments to better manage their own operations in order to reduce the risk of food borne illnesses.

HealthSpace is working with certain government health department clients on a pilot project that will encourage private restaurant establishments to integrate the HS CS Pro platform into their existing quality assurance program. By integrating HS CS Pro into the daily operations, a restaurant operator can perform quality checks on the full spectrum of their business. When the health department performs a routine inspection, the results are immediately uploaded to the app so management can easily compare their internal results with what the regulator is finding. This has significant value for restaurant chains where management can have third party verification of what their operators are doing without employing outside auditors. Additionally, correlating inspection information directly with internal quality control activity will have a significant impact on improving practices in the establishment, thereby improving public safety.

The application's customer engagement component allows operators to engage with their customers on a more frequent basis. It provides an opportunity to solicit customer experience feedback, communicate about upcoming events and specials and offer loyalty program benefits. All this via a smartphone app customers can download.

This next phase of advancements for HS CS Pro is being developed with the blockchain in mind. Once HealthSpace's blockchain solutions are commercially available, the CS Pro analytics dashboard will become part of the interface that drives user interaction. This will result in a blockchain network capable of delivering advanced analytics that both regulators and private industry operators will need inside of a distributed network.

- On March 21, 2018, the Company announced the Community Draft release of its whitepaper for a decentralized Verification, Inspection and Audit Marketplace, "The VIA Marketplace". The whitepaper provides a guiding basis for defining business strategy and use cases as well as outlining the technical thesis on how HealthSpace and partners will achieve this vision. HealthSpace created the whitepaper in conjunction with its blockchain partner SIMBA Chain Inc. along with the help of the Vanbex Group. The whitepaper can be accessed by visiting [www.healthspace.com](http://www.healthspace.com) or downloading directly from [https://s3.amazonaws.com/healthspace/HealthSpace\\_VIA-Marketplace.pdf](https://s3.amazonaws.com/healthspace/HealthSpace_VIA-Marketplace.pdf).

The VIA Marketplace proposes a robust mechanism for the simple transmission, sharing and access of data between government and private industry for the furtherance of health and safety. This is accomplished by allowing private industry to have direct access into the regulatory inspections performed against them and subsequently sharing their own audits for self reporting, similar to the way an IRS tax filing works.

While governments and private industry alike are determining how they can apply blockchain solutions in the future, the VIA Marketplace brings a newfound approach to the ability of regulators, software providers and private organizations to share data with easy-to-use toolkits and interfaces, all on a singular protocol within a distributed network. This supplants data curation systems of old, such as Carfax, by supplying information straight from the source for direct consumption by a broader audience. By doing so, inefficiencies are removed, transparency and governance is improved, and speed of commerce is increased by facilitating the ease of access to both regulatory and private sector data. The aim of this is to produce healthier and safer establishments which increases consumer confidence and builds better public trust.

HealthSpace will begin testing the alpha phase portion of the VIA Marketplace shortly with its partners at SIMBA Chain. The first phase of testing will include integration with the Windows and iOS versions of the HSTouch application. Once successfully completed, testing phases will begin with industry partners who have agreed to participate in early trials of the marketplace. These trials are expected to begin in Q2 2018.

2. Provide a general overview and discussion of the activities of management.

**Please see item 1**

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

**Please see description above.**

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

**None.**

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

**None.**

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

**None.**

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

**None.**

8. Describe the acquisition of new customers or loss of customers.

**None.**

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

**The Company is working on its alpha prototype, testing blockchain based quality and safety audits with industry partners.**

10. Report any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.

**None.**

11. Report on any labour disputes and resolutions of those disputes if applicable.

**None.**

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

**The Company is subject to a legal proceeding commenced by a service provider in November 2016. In June 2017 the Company filed a counterclaim to this service provider. Currently the Company is working with its legal counsel on the claim and counterclaim.**

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

**None.**

14. Provide details of any securities issued and options or warrants granted.

**None.**

15. Provide details of any loans to or by Related Persons.

**None.**

16. Provide details of any changes in directors, officers or committee members.

**None.**

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

**None.**

### **Certificate Of Compliance**

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to CSE that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all CSE Requirements (as defined in CSE Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.
