News Release

HealthSpace Announces Peterborough Public Health to Participate in the Alpha Phase of Its Blockchain Initiative - The VIA Marketplace API

Vancouver, BC – May 3, 2018 - HealthSpace Data Systems Ltd. (the "Company" or "HealthSpace") (CSE:HS) (Frankfurt:38H) (OTC:HDSLF) announced that Peterborough Public Health (Peterborough), Peterborough, Ontario has agreed to be the first environmental regulatory agency to pilot the VIA Marketplace. Peterborough will begin participating in a real world environment by having health officials use the HSTouch to enter inspections and audits performed across the city of Peterborough. HealthSpace will then utilize the VIA API for transmitting data to the Ethereum Blockchain.

The arrangement with Peterborough will mark the first implementation of an environmental regulatory app to transmit public health inspections to the blockchain, in real-time. By using the HSTouch app, inspectors' day-to-day duties are undisrupted while the API extrapolates much of the complex nature of blockchain data exchanges, making it a truly seamless mobile blockchain technology solution. Further, the VIA API interlays inspection data with distributed storage on the InterPlanetary File System which allows for documents of all kinds to be stored cohesively alongside regulatory inspections and private industry audits.

Peterborough Public Health serves the residents of Curve Lake and Hiawatha First Nations, and the County and City of Peterborough and offers a wide range of programs and services ranging from food safety, safe water, healthy environments, infectious diseases, rabies control, vector borne diseases, dental and sexual health clinic services. Environmental Health Program manager, Atul Jain stated that, "We are excited to be the first Ontario Local Public Health Agency to pilot this revolutionary new technology. It will increase the sharing and access of inspection data to enhance the protection and prevention of public health programs conducted by Peterborough Public Health."

HealthSpace CTO, Silas Garrison stated "This pilot is a crucial step in demonstrating how HealthSpace is perfectly positioned to bring blockchain technology to the government sector. It is an evolution of our technology stack that now incorporates Cloud, Blockchain and Mobile in one fell swoop. All of this is pivotal as we bring our technology into the private sector to prove how it can improve the health and safety of consumers in everything from food service to cannabis distribution to the agricultural supply chain."

About HealthSpace

HealthSpace is an industry leading technology company currently providing inspection, information, communication and data management systems for federal, state, county and municipal governments. Over the last decade, HealthSpace has successfully developed both enterprise and mobile internet-based applications currently serving over 300 state and local government organizations across North

America. HealthSpace currently offers the only integrated inspection, administration and analytics product suite across all platforms in North America. Further, HealthSpace now delivers inspection and auditing systems to private businesses enabling them to gain visibility and predictability into their operations to improve performance and safety. As HealthSpace continues to deliver focused service and innovative solutions to government and business organizations, it is developing advanced blockchain technology to revolutionize service delivery to its core market while expanding into other commercial enterprise verticals.

Forward-Looking Statements

This release may contain forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although HealthSpace believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward looking statements. HealthSpace expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.
