Feedback on this new platform from existing customers and new prospective clients in both government and commercial enterprise engagements has been very positive.**

**HealthSpace’s ongoing engagement with government customers in both the US and Canada continues to drive growth and viable learning opportunities to continue to innovate our technology offerings. In 2018, we are now actively introducing our platform and services into commercial enterprise clients in food & beverage, hospitality, assisted living, and child-care. Peterborough will begin participating in a real world environment by having health officials use the HSTouch to enter inspections and audits performed across the city of Peterborough. HealthSpace will then utilize the VIA API for transmitting data to the Ethereum Blockchain.**

**The arrangement with Peterborough will mark the first implementation of an environmental regulatory app to transmit public health inspections to the blockchain, in real-time. By using the HSTouch app, inspectors' day-to-day duties are undisrupted while the API extrapolates much of the complex nature of blockchain data exchanges, making it a truly seamless mobile blockchain technology solution. Further, the VIA API interlays inspection data with distributed storage on the InterPlanetary File System which allows for documents of all kinds to be stored cohesively alongside regulatory inspections and private industry audits.**
