News Release

HealthSpace Announces New Government Contracts in Illinois and Arizona

Vancouver, BC – July 10, 2018 - HealthSpace Data Systems Ltd. (“HealthSpace”) announces that the Company recently signed new contracts with Clay & Effingham County Health Departments and Stephenson County Health Department, both located in Illinois, as well as the Arizona Department of Health Services. These new customers have joined a growing list of health authorities that are choosing HealthSpace’s HSCloud Suite line of products to manage their health protection oversight and other regulatory activities.

HealthSpace President, Joseph Willmott stated “As more and more agencies begin signing on to our new Cloud-based products, it adds continued momentum for future sales growth. Government agencies like to see proven success stories before they make their software choices. Our proven track record of excellent service is now being combined with successful implementations of our Cloud solutions. This combined effect is resonating with agencies both small and large, which ultimately is culminating in strong sales growth.”

The combined value of the new contracts is \$54,791 USD over the next three years.

About HealthSpace

HealthSpace is an industry leading technology company currently providing inspection, information, communication and data management systems for federal, state, county and municipal governments. Over the last decade, HealthSpace has successfully developed both enterprise and mobile internet-based applications currently serving over 300 state and local government organizations across North America. HealthSpace currently offers the only integrated inspection, administration and analytics product suite across all platforms in North America. Further, HealthSpace now delivers inspection and auditing systems to private businesses enabling them to gain visibility and predictability into their operations to improve performance and safety. As HealthSpace continues to deliver focused service and innovative solutions to government and business organizations, it is developing advanced blockchain technology to revolutionize service delivery to its core market while expanding into other commercial enterprise verticals.

Forward-Looking Statements

This release may contain forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although HealthSpace believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from

those in forward looking statements. HealthSpace expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.
