**MONTHLY PROGRESS REPORT**  
**For the Month of July, 2018**

Name of CSE Issuer: **Healthspace Data Systems Ltd. (the “Issuer”).**

Trading Symbol: **HS**

Number of Outstanding Listed Securities: **139,672,988 common shares**

Date of filing: **August 2, 2018**

**Report on Business**

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

**HealthSpace develops and provides sophisticated information management system for the surveillance, business management, compliance and tracking of regulatory and quality control applications. Clients include government regulatory agencies and private sector businesses who require collected data along with auditing applications for the purpose of improving productivity, quality control and performance analysis.**

**HealthSpace’s ongoing engagement with government customers in both the US and Canada continues to drive growth and viable learning opportunities to continue to innovate our technology offerings. In 2018, we are now actively introducing our platform and services into commercial enterprise clients in food & beverage, hospitality, assisted living, and child-care. Ongoing discovery work based on HealthSpace’s agricultural capabilities is now being integrated into cannabis production and distribution processes through work with both US and Canadian partners.**

**HealthSpace has developed several relationships within the cannabis space and has begun detailing some product changes in order to cultivate market traction. The Company is exploring opportunities with multiple regulatory agencies that oversee and regulate cannabis producers. The Company intends on leveraging its vast experience in developing SaaS platforms for enforcement and compliance into the cannabis space where there is little in the way of software offerings that adequately handle compliance.**

- On July 9, 2018, the Company announced that in April of this year it had launched into the third party private audit space by providing its HSCloud Suite of products to Safe and Sound, a company providing health and safety audits for nationally known food service facilities across New York City and Los Angeles. This sale opens the door to a new growth vertical for the Company to offer its products to third party auditors. Third party auditors, often hired by an organization prior to being inspected by the government, need software and data solutions that are similar to that of a government agency. The Company projects this to be a potentially new high growth area.
  - On July 9, 2018, the Company announced that it had partnered with Keboola Data Services Inc. to develop an analytical data platform called HSData. It has since begun partnering with government health departments to pilot the data platform on an internal basis to provide richer insights to their day-to-day operations. Further, it is working with the same departments to provide the data platform to the restaurants they regulate. Utilizing the existing government relationships, the Company can offer government approved data solutions and quality assurance tools to restaurants, as well as other industries such as hospitality, who may be struggling to keep up with the regulatory demands. The collaboration between the Company and government agencies means HSData and other product lines can be offered by health departments on behalf of the Company.
2. Provide a general overview and discussion of the activities of management.
